

SHIVAM AGRAWAL

QA Engineer | Automation & Manual Testing Specialist

Kanpur Nagar, Uttar Pradesh, India | +91-6387746813 | shivamagrawal1june@gmail.com | linkedin.com/in/shivam-agrawal-126b99175

CORE COMPETENCIES

Manual Testing | Test Automation | REST API Testing | Regression Testing | Smoke & Sanity Testing | Cross-Browser Testing | Database Testing | Test Case Design | Test Plan & Strategy | Defect Lifecycle Management | Root Cause Analysis | Agile & Scrum

PROFESSIONAL SUMMARY

Results-driven QA Engineer with 2.5+ years of hands-on experience in manual and automation testing across fintech, gaming, health & wellness, and productivity domains. Proficient in Playwright, Selenium (Java), Cypress, and TestNG for web automation and cross-browser testing, with deep expertise in REST API testing using Postman (JSON/XML). Skilled in Excel-based test case design, full defect lifecycle management in JIRA, and version-controlling test scripts using Git. Consistently delivered measurable impact: reduced recurring bugs by 30-50% and improved testing efficiency by up to 40% across multiple Agile/Scrum delivery cycles.

TECHNICAL SKILLS

Automation & Frameworks: Playwright (JavaScript), Selenium (Java), Cypress, TestNG

Programming Languages: Java, JavaScript, Python, SQL

Testing Types: Manual Testing, Web Automation Testing, REST API Testing, Regression Testing, Smoke Testing, Sanity Testing, Functional Testing, UI/UX Testing, Database Testing, Integration Testing, Cross-Browser Testing, Stress Testing

Tools & Platforms: Postman (REST API / JSON / XML), JIRA, Git, Chrome DevTools, Microsoft Excel

Databases: MySQL

Methodologies: Agile, Scrum, Test Plan, Test Strategy, Test Case Design, Defect Lifecycle Management, Root Cause Analysis

PROFESSIONAL EXPERIENCE

GKM IT, Udaipur | QA Engineer

Aug 2023 – Present (2.5+ Years)

Collaborated with cross-functional Agile teams to deliver end-to-end QA across 5+ client products. Responsible for test planning, Excel-based test case design, manual and automation execution, REST API validation, defect lifecycle management in JIRA, and maintaining test scripts via Git.

Project: HRMS Portal – Nest (Internal Portal)

- Developed and maintained comprehensive Test Plans and Test Strategies for employee feedback, project allocation, and performance tracking modules.
- Performed Functional, Regression, Smoke, Sanity, UI/UX, and REST API Testing using Postman (JSON/XML), managing the complete defect lifecycle in JIRA.
- Designed and executed end-to-end automation test scripts using Playwright (JavaScript); maintained scripts in Git for version control and team traceability.
- Conducted cross-browser testing across Chrome, Firefox, and Edge to ensure consistent UI behavior across environments.
- Improved testing efficiency by 40% and significantly reduced production defects, enhancing overall portal stability.

Project: Fintech Platform – Accel

- Authored Test Plans and designed 200+ manual test cases in Excel covering investment management, portfolio tracking, and end-to-end funding workflows.

- Conducted Functional, Smoke, Sanity, UI/UX, REST API (JSON), and Database Testing; managed full defect lifecycle from discovery to closure in JIRA.
- Validated portfolio data accuracy by executing targeted SQL queries against MySQL database to detect and report data mismatches.
- Achieved 50% improvement in investor data representation accuracy and reduced critical defect leakage before production releases.

Project: Gaming Platform – KGen

- Executed Functional, Smoke, UI/UX, REST API, and Database Testing for gamified user acquisition flows, engagement tracking, and reward calculation logic.
- Conducted cross-browser testing to identify and resolve gamified quest logic discrepancies causing cross-platform inconsistencies.
- Maintained structured Excel-based test cases and tracked all defects through the complete defect lifecycle using JIRA.
- Improved user engagement testing efficiency by 35% and ensured cross-platform functionality across all user segments.

Project: Health & Wellness App – Nourish

- Designed Excel-based test cases and executed Test Plans covering Functional, Smoke, Sanity, UI/UX, Integration, Regression, and REST API testing.
- Validated API request/response payloads (JSON/XML) in Postman for data accuracy and synchronization across frequent feature release cycles.
- Identified critical edge cases through structured manual test cycles, reducing release delays and increasing client satisfaction scores.

Project: Productivity App – Precious

- Conducted Functional, Smoke, Sanity, UI/UX, Integration, Regression, and REST API Testing for a goal-tracking and time-management application.
- Designed 150+ Excel-based test cases to validate goal progression calculations, time-logging logic, and reporting accuracy; tracked full defect lifecycle in JIRA.
- Collaborated with developers using Git-based workflows for fix verification and re-testing, reducing recurring bugs by 30% across new releases.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science Engineering

July 2019 – June 2023

Dr. Virendra Swarup Memorial Trust Group of Institutions, Unnao | CGPA: 8.6/10

Intermediate (12th Grade)

2019

Kamad Giri Inter College | 78%

KEY ACHIEVEMENTS

- Reduced recurring production bugs by 30% on Precious productivity platform through structured Excel-based test case design and iterative developer collaboration.
- Achieved 50% improvement in investor data accuracy on Accel fintech platform by validating end-to-end funding workflows and running targeted SQL database queries.
- Improved user engagement testing efficiency by 35% on KGen gaming platform via systematic cross-browser and REST API validation.
- Boosted QA efficiency by 40% on HRMS Nest portal by building and maintaining Playwright automation scripts for critical regression flows.
- Delivered complete end-to-end QA ownership across 5+ products in diverse domains with zero critical defect escape on final production releases.
